

TOOLS FOR MONITORING AND MEMORISING THE HOLY QUR'AN

بطاقات للمراقبة و لتحفيظ القرآن الكريم

How it works

Monitoring tools, gathered in this booklet, are provided to validate what the student has learnt, to keep a regular record of their work and their behaviour, and to allow an exchange between teachers and parents. How well the student's learning goes will depend directly on how these tools are used by teachers and by parents.

The Holy Qur'an memorisation planners

The memorisation planners are used regularly by the teacher to support the student in learning and memorising the Holy Qur'an. They record how far the student has progressed in their learning and what they have secured.

The homework tables

The student must complete the homework recorded in the "Holy Qur'an memorisation homework" tables. Each row of these tables sets a portion of a surah to learn, or to revise, for the next session. The teacher assesses the student's recitation and behaviour in class. Parents must check and sign the teacher's assessment before the next session.

Consulting the memorisation planners and the homework tables regularly will keep parents informed, at any time and continuously, of the student's performance and progress, as well as of their conduct in class.
